

# **Global Platform for Sustainable Natural Rubber**

# The supply chain

# The problems

## Environmental

Deforestation

Resource Management  
(e.g water)

Biodiversity Loss

## Social

Labour rights

Living and working  
conditions

Gender Equality

Land grabbing

## Economic

Low income for farmers

Low and fluctuating  
prices

Lack of equity

# What is GPSNR?

300+ members representing more than 55% of the global NR value chain

## Manufacturers

## End users

## Producers, Processors and Traders

195  
Smallholders  
across 12  
countries.

## Civil Society

## Affiliate Members

# **The impact of EUDR on the Rubber value chain**

# EUDR opportunities

## Environmental

Deforestation checks  
(especially egregious  
actors)

Rewards for  
sustainability

## Social

Land tenure  
formalisation

Checks on illegal  
operations

Traceability for  
engagement

## Economic

Better/longer term  
contracts

Better prices

# EUDR risks

## Environmental

Deforestation due to exclusion

## Social

Customary and native land use rights not recognised

Living and working conditions of informal workers

## Economic

Smallholders exclusion/two tier market

Worst prices for smallholders

More funds for traceability/less for sustainability

# What are GPSNR members doing to address EUDR?

Risk

Legality studies for Indonesia, Thailand, Vietnam and Malaysia

National ESG Risk Assessments for 20 countries

Traceability

Traceability guidance for suppliers

Via GPSNR assurance model mandatory targets

Support

Shared Investment Mechanism to support Capacity Building for Smallholders
